

[Insert title of invention]A System and Method for connecting consumers with a diverse set of consultants and experts

Abstract

It is the objective of the current invention to provide a system that will allow Users to contact Service Providers in specific fields. The User will choose a Service Provider via an Internet-based icon from within any one of a broad base of Internet interfaces maintained by the system or the Service Provider. Once a Service Provider is chosen, a pop-up window will appear telling that User if the Service Provider is available. If the Service Provider is available the system will connect the User with the Service Provider. If the Service Provider is unavailable the system will prompt the User to try again later or send an e-mail to the Service Provider.
